

## MOVING VISION OF FIRE ANGELS ON ASSIGNMENT

By Joanne Cook Danner

On September 9, 2021, I went to bed and fell into a light sleep. I was awakened by a moving vision in my spirit. I watched the vision in the eye of my spirit as it came before me.

I first saw a beautiful female angel with golden blond hair appear in the dark universe above the earth holding a brightly lit lantern in her left hand. The lantern in the left hand represented that all that is in opposition of the governmental authority in the right hand of God will be removed. The light will cause it to be revealed. She was holding the lit lantern high above her head into the darkness of the universe as she descended in full force from her feet in an upright position from that place in the third heaven toward the earth. It was as if she were making a declaration that would pierce the darkness as this tabernacle of light was being transported. It was a movement of light coming toward the earth that was to bring an awakening of light to disband the darkness and bring revival.

The frame of the lantern that the angel was holding was black with a large black ring handle on the top of it. The lantern was square with open panes along the sides. As I studied the lantern, I saw that it did not have a light inside of it. It was lit with live sparks that were similar in appearance to what you would see on a lit sparkler that someone would hold on the fourth of July. I inquired of the Lord what the meaning of the vision was. A strong voice from within my spirit said that "this was a fire angel bringing the sparks of revival to the earth that will catch fire throughout the world."

As that was revealed, I saw the top of the wings of multitudes of fire angels swiftly flying downward. Their wings were white with tips of silver, and the tops of the wings were almost translucent. You could almost see through the wings. There was a sense that the fire angels were not only bringing the fire of revival, but they were coming on assignment to join those on the earth that will co-labor with the Lord during this end-time harvest revival season.

The revival sparks were not able to be contained within the lantern. The open sides of the lantern were meant to release the sparks into the atmosphere as

a channel for the release of the glory of God. The sparks of revival were released to ignite and reproduce the revival fire. The fires of glory and revival
